Table of contents

- Events 1, 2, and 3 (Plate 1) -- Continental crust formation during the Variscan orogenic cycle (400 - 299 Ma)**
- Event 4 (Plate 2) -- Post-Variscan lithospheric thinning (299 - 201 Ma)**
- Event 5 (Plate 3) -- Alpine rifting, development of passive margins, and ocean formation**
- Event 6 (Plate 4) -- Alpine subduction (100- 45 Ma)**
- Event 7 (Plate 5) -- Alpine collision (45 - 23 Ma)**
- Event 8 (Plate 6) -- Apenninic subduction (28 - 23 Ma)**
- Event 9 (Plate 7) -- Opening of the Western Mediterranean (Ligurian-Provençal basin) during the rotation of the Corsica-Sardinia block (23 - 15 Ma)**
- Event 10 (Plate 8) -- Inversion of the Ligurian-Provençal margin (15 Ma - present)**
